

USCG Chief Tervis Cups

VIRTUALLY SHATTERPROOF!

The high-grade polycarbonate material is the same stuff used to make bulletproof shields! They'll endure drops on the buoy deck or tumbles down the ladder well.

KEEPS COLD DRINKS COLDER and HOT DRINKS HOTTER!

The unique double-walled construction uses the insulation properties of air to keep your drinks - hot or cold - so your coffee will stay hot in CIC and your sweet tea will stay cold in MMR.

FREEZER SAFE!

Keep your milk shake from morale night in the freezer until you return from the port call and NO MID-RATS are available.

MICROWAVE SAFE!

So go ahead and reheat that cold coffee on your next round.

REDUCES CONDENSATION!

No condensation means no sweating, so unless you're taking heavy rolls and you forgot your lid your tumbler will stay dry and in your hands for as long as you like.

PREVENTS RINGS!

No sweating means no pesky rings on the chart table. This will keep those BMs happy. Just remember to use your lid.

DISHWASHER SAFE!

So don't worry if the messcook runs your cup thru the scullery

*Guaranteed
FOR LIFE!*

**\$15.00 for cup and lid
plus shipping**
